## SUMMARY

Full-stack engineer specializing in Web3, DeFi, and AI-powered platforms with 2+ years of experience building scalable applications across blockchain gaming, crypto exchanges, and EdTech. Multiple hackathon winner in Ukraine's blockchain and DeFi ecosystem.

## SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, TailwindCSS, Shadcn UI.

Backend: Node.js, Go, Python, PostgreSQL, GraphQL, REST APIs, Drizzle, Convex, tRPC, Hono.

Web3/Blockchain: Wagmi, Viem, RainbowKit, Ethereum, Base, Solana, ERC20, ERC721, Solidity.

Cloud & DevOps: Google Cloud Platform, Kubernetes, Docker, Vercel, Neon.

Tools & Libraries: React Query, Zustand, Jotai, RabbitMQ, Telegram SDK.

## WORK EXPERIENCE

### ***Middle Full Stack Engineer at Abstract, Remote Contract***

**May 2025 - Aug 2025**

[abstract.money](#) - bridges traditional and decentralized finance through tokenized investment vaults.

- Built DeFi investment app with React, Wagmi, Viem, RainbowKit, TailwindCSS, Shadcn UI.
- Redesigned investment platform interface for better navigation and portfolio management.
- Created modern landing page for Voltaire Finance.

### ***Middle Full Stack Engineer at Unigox, Remote Contract***

**May 2025 - July 2025**

[unigox.com](#) - automated P2P crypto-fiat exchange with ZK-TLS verification.

- Developed referral dashboard with user tracking and commission calculations.
- Enhanced admin panel stability, resolved system crashes for P2P trading operations.
- Redesigned vendor dashboard for crypto sellers with improved UI/UX.

### ***Middle Full Stack Engineer at Babywhale, Remote Contract***

**Jan 2025 - Apr 2025**

[babywhale.meme](#) - is a meme cryptocurrency on Base blockchain that provides token aggregation and AI-powered analytics tools to help users discover and analyze newly launched tokens from trusted launchpads.

- Developed responsive landing page using Next.js, TailwindCSS, Shadcn UI.
- Built trading dashboard for Base blockchain with Next.js, React Query, Jotai.
- Resolved critical bugs and performance issues across platform.
- Implemented blockchain indexing pipeline using Viem, Wagmi, Node.js/Nest.js.

## WORK EXPERIENCE

### ***Middle Full Stack Software Engineer at Monsta, Remote***

**Oct 2024 - May 2025**

[monsta.wtf](https://monsta.wtf) - is a blockchain gaming platform where users earn \$MONSTA tokens through gaming.

- Developed Telegram mini app from scratch using React, TailwindCSS, React Router, Telegram Mini App SDK.
- Built and migrated Telegram bot backend from Python to Go, improving performance.
- Implemented chat broadcast service in Go with RabbitMQ for message queuing.
- Architected scalable backend services with PostgreSQL integration.
- Deployed on GCP using Kubernetes, hosted frontend on Vercel.
- Developed internal analytics dashboard for real-time monitoring.
- Implemented 'Mines' game algorithm with optimized performance.

### ***Junior Full Stack Software Engineer at Artellence, Remote***

**Jan 2024 - Oct 2024**

[artellence.com](https://artellence.com) - Artellence develops AI-powered digital tools for OSINT (Open Source Intelligence)

- Optimized admin panel for mobile responsiveness.
- Developed dashboard features using React, React Router, GraphQL, React Query, SCSS.
- Implemented AI-powered features with SDK integration and real-time notifications.
- Resolved critical bugs in BigDataPeople product.
- Built image search functionality for OSINT investigations.

### ***Junior Full Stack Engineer at Hearify, Remote***

**Oct 2023 - Jan 2024**

[hearify.org](https://hearify.org) - AI Quiz Generator for Tests, Surveys, and Interactive Content Creation

- Streamlined teacher onboarding flow using React, Formik, React Router, TanStack Query, and Zustand for AI quiz platform
- Modernized legacy UI components and added multimedia quiz creation features for educators
- Built cross-browser compatible React components for global quiz generation interface

## ACHIEVEMENTS

Winner of multiple blockchain and DeFi hackathons such as:

- ETHKyiv Impulse: Farcaster Mini Apps (Frames) Edition
- ETHKyiv Impulse: Based Edition

## EDUCATION

### ***Ivan Franko National University of Lviv***

**Sept 2022 - Jun 2026**

Currently pursuing Bachelor's degree in Cybersecurity
